Letter of Transmittal

To His Excellency, Governor Thomas L. Judge
and Members of the Forty-sixth Legislative Assembly
of the State of Montana:

In compliance with the duty imposed upon the Department of Revenue by Section 84-708.1 subsection 16 of the Revised Codes of Montana (1947), the Department herewith submits its Report for the period July 1, 1976 to June 30, 1978.

Laury M. Lewis
Acting Director
Department of Revenue

Report of the State Department of Revenue

To the
Governor and Members of the Forty-sixth
Legislative Assembly of the
State of Montana

For the Period
July 1, 1976 to June 30, 1978

STRUCTURE AND FUNCTIONS OF THE DEPARTMENT OF REVENUE

The Department of Revenue is charged with several duties by section 84-708.1 R.C.M. (1947). These duties fall into five main categories:

- (1) General supervision over the administration of state tax laws;
- (2) Assessment of intercounty property and apportionment of these assessments to the counties in which the properties are located;
- (3) Equalization of valuation of taxable property;
- (4) Continuing research aimed at greater efficiency in administration of tax laws and at formulation of legislation which will result in more equitable and just taxation; and
- (5) Supervision of the sale and taxation of distilled spirits, wine, and beer.

The Department of Revenue consists of seven operating divisions which have actual administrative responsibility for tax laws and six support divisions which perform a variety of internal functions within the Department.

The following table indicates the administrative responsibility of each operating division.

DIVISION	Administrative Responsibility
Corporation Tax	Corporation License Tax Corporation Income Tax
Income Tax	Individual Income Tax
Inheritance Tax	Abandoned Property Escheated Estates Inheritance Tax
Liquor	Laws Governing Sale, Taxation, and Consumption of Distilled Spirits, Wine, and Beer
Motor Fuels	Licenses and Taxes Pertaining to Gasoline and Special Fuels
Property Valuation	Property Tax Laws
Miscellaneous Tax	Camper Decal Cement and Gypsum Producers License Tax Cigarette Tax Cigarette Wholesaler and Retailer License Coal Retailers License Tax

Coal Severance Tax
Consumer Counsel Tax
Contractor's Gross Receipts Tax
Electrical Energy Producers License Tax
Express Company License Tax
Freight Line Company License Tax
Metalliferous Mines License Tax
Micaceous Minerals Mines License Tax
Minimum Cigarette Price Law
Oil or Gas Producers Severance Tax
Public Contractor's License
Resource Indemnity Trust
Rural Electric and Telephone Cooperative License Tax
Sleeping Car Company Tax
Store License Tax
Telephone Company License Tax
Tobacco Products Tax
Tramway Gross Receipts Tax

The support Divisions of the Department perform a diverse collection of tasks, most of which relate to the internal administration of the Department. The following table illustrates some of the chief duties of the support Divisions.

DIVISION	Function
Audit and Accounting	Process department cash receipts, payroll, and accounting documents. Internal audits and collection of bad debts owed state.
Data Processing*	Design and development of computerized systems which facilitate rapid manipulation of large quantities of information.
Investigation	Enforce compliance with statutes governing the sale of alcoholic beverages. Investigation of tax and welfare fraud cases. Enforce child support orders.
Legal	Legal services for Department
Operations	Department supplies and mail service Personnel management
Research*	Estimate revenue from tax sources Generate statistical reports Provide information to the public on all aspects of the state's tax structure.

*These Divisions are to be consolidated to form the Research and Information Division.

Corporation Tax Division

Revenue of \$54.2 million was collected during the biennium which ended June 30, 1978, an increase of \$9.2 million over the preceding two-year period. The audit effort of the Corporation Tax Division continued to produce significant results. An aggregate of over \$4 million was collected from the audit program. Field audits of 41 large multistate corporations produced \$2.2 million and, as a result of active investigation, 168 corporations which failed to file corporation license tax returns for prior years were identified and more than \$.75 million in tax was collected.

Income Tax Division

In 1975, the 44th Legislative Session approved an increase in the audit staff from five to nine auditors; the 45th Legislature authorized hiring two additional auditors during the fiscal year ended June 30, 1978. The result of the increase in audit manpower is shown by the dramatic increase in the amount of additional tax assessed as the result of examinations by the audit staff from \$1,137,423 for the fiscal year ended June 30, 1975 to \$2,235,283 for the fiscal year ended June 30, 1978. The amount of overpayments of tax disclosed by examination also increased from \$137,774 to \$247,343 during that period. For the fiscal year ended June 30, 1978, audit and compliance activity produced \$3,742,000 in assessments of additional tax, penalty and interest—more than 3.7 times the amount budgeted for the entire Income Tax Division.

Miscellaneous Tax Division

On July 1, 1977, a major revision of the Electrical Energy License Tax enacted by the 45th Legislative Session was implemented. It provides that all electrical energy produced in Montana is taxed rather than taxing only electricity sold in Montana.

A new Tramway Gross Receipts Tax was also implemented during the biennium. Tax receipts are used to pay salary and other expenses of personnel who conduct safety inspections on ski lift equipment.

Liquor Division

Profits from liquor operations exhibited a 12% increase in the Fiscal 1977 and an additional 11% increase in the Fiscal 1978. The new warehouse was completed and occupied in March 1978. It is completely mechanized and its capacity is three times that of the old facility. Average case capacity has increased from 82,000 cases to 115,000 cases but the work force has been reduced by five full time equivalent (FTE) positions.

A procedure for product listing and delisting was developed and implemented. Meetings of the committee responsible for this function are open to the public. About fifty new items have been added to the list over the past eighteen months. Service level to the stores has averaged 93% on those items composing the top 80% of listed items. Electronic cash registers have been installed in 10 of the largest stores. The backup system to tie these machines to the central computer is in the development stage and when complete will vastly improve our inventory control and forecasting accuracy. An additional twenty registers are on order and their arrival will extend this capability to all of the grade 12 and 11 stores.

The division has continued to monitor financial operations of all stores. In the Fiscal 1978, five stores were converted to self-service and fifteen outlets remodeled to provide more efficient stocking methods and greater customer convenience. Three stores were converted to agencies and two others closed.

An independent, professionally experienced hearings officer, now conducts license and violation hearings. This function, which was once performed by Division personnel, has thus, been better insulated from the possibility of bias. This move also promises a more solid base for decision making in the event of an appeal.

Early in Fiscal 1979, a comprehensive store ordering and warehouse shipping schedule was implemented. The position of District Super-

visor, which will provide technical assistance to, and a direct communication link with, all state stores and agencies, was also implemented at about the same time.

RECOMMENDATIONS

Audit and Accounting

The Department of Revenue administers two accounting entities in the sinking fund which are no longer necessary because the bonds have been paid. Now, only very small collections of delinquent taxes for years in which the mill levies were in effect are being made by counties. The accounting entities are the Boulder River School Sinking Account and the Warm Springs State Hospital account. As of June 30, 1978 there was \$99,185 in the Boulder River School Sinking Account and \$16,549 in the Warm Springs State Hospital account. The department recommends legislation to provide for disposition of the accumulated money and any further revenue which is collected for the accounts.

Inheritance Tax

The Department recommends that section 91-4407 be amended in order to prevent deduction of 100% of a mortgage attached to property when the property itself is reported at less than 100%. This would remedy the present situation in which the deduction for a mortgage can be greater than the value of the interest which is passed.

The Department recommends that sections 91-501 through 91-546 (the Escheated Estate Act) be rewritten in order that it parallel the Uniform Probate Code adopted by the 43rd Session.

There are several modifications of the state's abandoned property law which would be beneficial. It is recommended that section 67-2206 and 67-2212 be amended to, respectively, require a report from corporations upon dissolution and to increase the minimum value for which publication is required to \$50. It is proposed that section 67-2214 be amended to provide relief from liability for transfer agents and corporations which deliver stock and other certificates to the state. Finally, it is recommended that the state be empowered to sell listed securities through the exchange upon which they are listed and to permit the Department to sell unlisted securities in any way it deems advisable.

Income Tax

The Department recommends the enactment of legislation to clarify and update various provisions of the Income Tax Law and to correct certain problems which occur because of changes in the Federal Income Tax Law.

Section 84-7403 allows individuals and certain small business corporations a deduction for an investment in a building for energy conservation purposes. This section does not define "energy conservation purposes" nor does it provide any criteria for determining whether or not a particular expenditure qualifies for the deduction. As the result, there is a notable lack of agreement as to what expenditures qualify for the deduction, and the statute is exceedingly difficult to administer. The Department recommends that section 84-7403 be amended to specifically enumerate installations that qualify for the deduction.

Section 84-4960 provides for the investment tax credit but does not provide specific rules for determining the allowable credit. The Department recommends that this section be amended to clearly provide that the credit shall be determined according to the Federal law upon which the credit is based and also to specifically provide that the Federal "recapture" rules apply.

Section 84-4912, which provides for the taxation of estates and trusts, has remained virtually unchanged since its original enactment in 1932. The provisions of this section are generally vague, in-

adequate, or inapplicable. The Department recommends that section 84-4912 be amended to specifically provide for determining the taxable income of estates and trusts according to current provisions of the Internal Revenue Code.

A recent change in Federal Income Tax Law requires taxpayers claiming the Federal Jobs Credit to reduce their deduction for salaries and wages paid by an amount equal to the credit claimed. Inasmuch as the taxpayer's Montana adjusted gross income is defined in terms of his Federal adjusted gross income, it is arguable that taxpayers who claim the Federal Jobs Credit have lost a part of their Montana deduction for salaries and wages, notwithstanding the fact that Montana does not allow the Jobs Credit. Accordingly, the Department recommends that section 84-4905, defining adjusted gross income, be amended to clearly allow a full deduction for salaries and wages paid. Another change in Federal Income Tax Law excludes certain "lump-sum" settlement income from adjusted gross income and subjects it to a special tax computation. Income of this nature is no longer subject to Montana Income Tax because of the exclusions from adjusted gross income. Section 84-4905 should be amended in order to specifically include such income for state income tax purposes.

As the result of a change in the Federal Law, political contributions will not be allowed as a deduction after 1978. Instead, a tax credit has been instituted. If Montana is to continue allowing a deduction for political contributions, section 84-4906 must be amended to specifically provide for such treatment.

Investigation Division

The current statutes for Welfare Fraud provide for a criminal penalty only. There are no provisions for restitution or financial penalty. The Department recommends that Montana adopt the principles of the Washington state statute. Under this law, if fraud is established, either provider of services (vendor) or recipient (family head), must repay the full amount plus a twenty-five percent penalty. If the amount to be repaid is set by arbitration in lieu of prosecution, the 25 percent penalty is also assessed. The penalty is more closely related to the severity of the offense.

The Department recommends that section 4-4-301 be amended. The proposal would remove the requirement that there be an actual criminal court conviction prior to action by the Department relating to a false application for alcohol beverage licenses. In recent years, the Department has received an increasing number of applications which involve false statements. For example, individuals who have served jail sentences have sworn to the fact that they have never been arrested; and applicants have falsely sworn to the identity of parties who have a financial interest in an enterprise.

Legal

The Department recommends legislation creating an administrative procedure in the area of child support enforcement. The proposed legislation is primarily designed to allow for the establishment of child support obligations by a hearings magistrate in lieu of the filing of a petition in the Montana district courts. While the administrative procedure substantially parallels the due process protections of the court system, the establishment of administrative support orders will work to relieve the caseload of the district courts, establish support obligations more promptly, make uniform the amount of support required of parents in similar financial circumstances, and relieve the increasing tax burden in the area of welfare assistance.

In the past few years the Department has begun to receive a number of "Fifth Amendment" protest income tax returns. These "returns" provide the Department with absolutely no information upon which it can assess or collect a tax and pose a threat to the very existence of our voluntary income tax system. In an attempt to curb this unlawful activity, the Department has instigated several criminal prosecutions

pursuant to Section 15-30-321, MCA (84-4924, R.C.M. 1947). However, as it now appears that many more prosecutions will be necessary under that statute, and based upon the large number of issues and challenges that have been raised concerning the statute as it is now written, some changes would appear to be in order. The Department recommends three specific areas where Section 15-30-321 could be improved to provide for more effective enforcement of the income tax laws.

First, a specific statute of limitations should be enacted. It has been argued that as it now stands, the general one-year statute of limitations for misdemeanors applies to prosecutions under Section 15-30-321. One year is not sufficient time to investigate and prepare a prosecution of this nature. Therefore, Section 15-30-321 should be given its own specific statute of limitations. This has been done in the civil area of tax collection and would be very helpful in the criminal area as well.

Second, Section 15-30-321 should provide that, in the prosecution of these cases, venue lies in Lewis and Clark County. The departmental personnel, expertise, and records necessary to prosecute these cases are all located in Helena, Montana. If the Department were required to prosecute in the county of the defendant's residence, the cost and hardship involved for the Department would make effective enforcement of the income tax laws impossible.

Third, the provisions of Section 15-30-321 concerning the necessary "intent" of the wrongdoer should be changed and put in terms of "willfulness". The federal government and most other states all use the term "willfully" in their statutes. Consequently, there has been a great deal of case law established which sets standards for determining intent in terms of willfulness. It would be very helpful if Montana courts could draw from these established standards in making a determination as to whether the necessary intent is present in a prosecution under Section 15-30-321.

In 1974, the Legislature created the State Debt Collection Service under Title 84, Chapter 71, R.C.M. 1947, with the Department of Revenue as the administering agency. The State Debt Collection Service is operative under the Department's Audit and Accounting Division, and has been functioning in conformity with state and federal requirements on debt collection practice for the past four years. With the new codification of state laws, it has come to light that certain provisions of Section 79-101, R.C.M. 1947, relating to the duties of the State Auditor's Office may conflict with Title 84, Chapter 71. Some action should be taken to remedy this.

The power to collect state debts has been centralized under the Department's Debt Collection Service, except that under Section 79-101, the State Auditor's Office has the power to offset money which would otherwise be paid out by the state to a debtor. This power properly lies with the State Auditor's Office.

A proposal has been submitted to consolidate Title 84, Chapter 71, R.C.M. 1947, with all the debt collection provisions in Section 79-101, R.C.M. 1947, under new section 17-4-101, et seq., MCA. The Department recommends against such a consolidation. First, two separate and distinct administrative agencies are involved, each having its own duties and powers. Second, as the State Debt Collection Service is a full-blown "collection agency", it is required to meet many standards set by state and federal law regarding debt collection practice which do not necessarily apply to the functions of the State Auditor's Office.

Miscellaneous Tax Division

The Department recommends that legislation be enacted to revise procedural requirements for four license taxes administered by the Miscellaneous Tax Division. This would complete the efforts of the last four legislative sessions to standardize penalty and interest assessments, provide statutory authority for granting of extensions

and waiving of penalties, delete references to the State Treasurer, and provide a procedure for filing of liens to assist in the collection of unpaid license taxes.

Section 82-1925.1 requires that the Department make a narrow residency determination for all licensed public contractors. It has not been possible to make these determinations within the ten day period specified for issuing licenses. Since questionable cases do not number more than two or three per year, it is recommended that this section be amended to provide that residency determinations be made only when they are needed by an awarding agency.

Motor Fuels

Section 84-1831(h) and Section 84-1832 exempt counties, incorporated cities, towns and school districts from the levy and imposition of the special fuel tax. The Department recommends legislation to include an exemption from the levy and imposition of the fuel tax for state agencies.

The Department of Revenue has experienced difficulty administering section 84-1855 which deals with the refund of the gasoline tax when gasoline is used off-highway. Amendments to the section are recommended to correct the present problems and reduce the size of the refunds.

Property Tax

The Department recommends that legislation be enacted which would replace the property tax on motor vehicles with a license fee which will produce about the same amount of revenue for local governments. Montana is one of the sixteen states which continues to tax motor vehicles as property. All other states have switched to a fee system. The proposal bases the fee paid on a combination of weight and age of the vehicle. The system is much simpler to administer, easier for the vehicle owner to understand and eliminates many of the inequities which currently exist between taxing jurisdictions.

The 44th Legislative Assembly enacted legislation requiring the Department to develop and implement a cyclical appraisal plan. That law required that approximately 20% of the property in the state be reappraised and the new values placed on the tax rolls annually.

Implementation of the five year appraisal cycle resulted in numerous lawsuits in 1975 and 1976 prompting the governor, on June 29, 1976, to issue an executive order returning all values to the 1974 levels until settlement of the disputed cases by the Supreme Court. The 45th Legislature provided funding to insure that all property be reappraised and placed on the tax rolls for the 1978-79 property tax year. This project has been accomplished. However, state law still requires a five year cyclical appraisal program as originally directed by the 44th Legislature. The Department recommends that this law be repealed and that all property be reappraised on a periodic basis and that all new values be used for tax purposes in the same year.

EDITOR'S NOTE

This "Report" contains the format which was initiated in the "Report of the Department of Revenue 1974-1976". However, the Forty-Fifth Legislature made some significant changes in the state's property tax law which are reflected in the data contained in this "Report". The value reported for 1977 is assessed value which, under the law in effect at the time, was set at forty percent of full value. The value reported for 1978 is market value. In parentheses, following each item named, is the statutory percentage which may be used to calculate taxable value from the value reported. The fact that these percentages are markedly lower for 1978 merely reflects the move to a market value standard.

For those who wish to use the values reported in this publication for research purposes, a word of caution is in order. The change to a market value basis has introduced a discontinuity into the data series which the Department has been publishing in this "Report". The only hope for establishing a consistent series lies in the series of taxable values which can be derived from the reported values by applying the proper percentage.

Finally, the caveat found in the last "Report" concerning the accuracy of certain items is still in force. In particular, the number of motor vehicles listed in many counties should be treated with skepticism since the staggered registration system has made it almost impossible for an accurate count to be made. More reliable statistics in this area are available from the Registrar of Motor Vehicles.

CLASSIFICATION OF PROPERTY FOR PURPOSES OF TAXATION

The 1977 Legislature overhauled the classification system for property taxation. Prior to 1977 property was assessed at a varying percentage of market value. The next step was to calculate taxable value, which was a varying percentage of assessed value. The procedure was simplified, leaving the effective rate of taxation unchanged. One step was eliminated from the calculation by defining taxable value as a varying percentage of market value. In order to keep the effective rate of taxation unchanged it was necessary to increase the number of property classifications from 11 to 19.

84-401. (2001) Assessments, definitions, and exceptions. (1) All taxable property must be assessed at 100% of its market value except as provided in subsection (5) of this section and in 84-429.14 through 84-429.17.

(2) Market value is the value at which property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts.

(3) The department of revenue or its agents may not adopt a lower or different standard of value from market value in making the official assessment and appraisal of the value of property in class one and class seven through eighteen. For purposes of taxation, assessed value is the same as appraised value.

(4) The taxable value for all property in class one and classes seven through eighteen is the percentage of market value established for each class of property in 84-301.2 and 84-301.8 through 84-301.19.

(5) The assessed value of properties in 84-301.3 through 84-301.7 [and 84-301.20] is as follows:

(a) Property in 84-301.6, under class five, is assessed at 100% of book value, by the method established in 84-301.6 and the sections cited therein.

(b) Properties in 84-301.3, under class two, are assessed at 100% of the annual net proceeds after deducting the expenses specified and allowed by 84-5403.

(c) Properties in 84-301.4, 84-301.5, and 84-301.20, under classes three, four, and nineteen are assessed at 100% of the annual gross proceeds.

(d) Properties in 84-301.7, under class six, are assessed at 100% of the productive capacity of the lands when valued for agricultural purposes. All lands that meet the qualifications of 84-437.2 are valued as agricultural lands for tax purposes.

(6) Land and the improvements thereon are separately assessed when any of the following conditions occur:

(a) ownership of the improvements is different from ownership of the land;

(b) the taxpayer makes a written request; or

(c) the land is outside an incorporated city or town.

(7) The taxable value of all property in classes two through six [and nineteen] is the percentage of assessed value established in 84-301.3 through 84-301.7 [and 84-301.20] for each class of property.

84-301.1 Classification of taxable property. For the purpose of taxation, the taxable property in the state shall be classified in accordance with 84-301.2 through 84-301.19 [84-301.21].

84-301.2. Class one property—description—taxable percentage. (1) Class one property includes the right of entry which is a property right reserved in land or received by mesne conveyance (exclusive of leasehold interests), devise, or succession to enter land whose surface title is held by another to explore, prospect, or dig for oil, gas, coal, or minerals. The market value of the right of entry is determined by the department of revenue.

84-301.3. Class two property—description—taxable percentage. (1) Class two property includes the annual net proceeds of all mines and mining claims, except coal and metal mines.

(2) Class two property is taxed at 100% of its annual net

proceeds after deducting the expenses specified and allowed by 84-5403.

84-301.4. Class three property—description—percentage. (1) Class three property includes the annual gross proceeds of coal mines using the strip mining method.

(2) Class three property is taxed at 45% of its assessed value, which is 100% of annual gross proceeds.

84-301.5. Class four property—description—taxable percentage. (1) Class four property includes the annual gross proceeds of underground coal mines.

(2) Class four property is taxed at 33 1/3% of its assessed value, which is 100% of annual gross proceeds.

84-301.6. Class five property—description—taxable percentage. (1) Class five property includes moneyed capital and shares of banks.

(2) Class five property is valued and taxed as provided under 84-304, 84-305, 84-307, 84-308, and chapter 46, Title 84.

84-301.7. Class six property—description—taxable percentage. (1) Class six property includes agricultural land, as defined in 84-437.2.

(2) Class six property is taxed at 30% of its assessed value.

84-301.8. Class seven property—description—taxable percentage. (1) Class seven property includes:

(a) centrally assessed utility allocations after deductions of locally assessed properties, except as provided in:

(i) class fourteen for rural telephones; and

(ii) class eighteen for cooperatives;

(b) all other property not included in classes one through six and classes eight through nineteen;

(c) large trucks and commercial trailers valued in the department of revenue's truck and commercial trailer schedule.

(2) Class seven property is taxed at 16% of its market value.

84-309.9. Class eight property—description—taxable percentage. (1) Class eight property includes:

(a) all agricultural and other tools, implements, and machinery except

(i) large farm machinery included in class twelve; and

(ii) tools, implements and machinery included in class fourteen

(b) gas and other engines and boilers and threshing machines and outfits used therewith;

(c) harness, saddlery, and robes;

(2) Class eight property is taxed at 13% of its market value.

84-301.10. Class nine property—description—taxable percentage. (1) Class nine property includes:

(a) automobiles, motor trucks, and other power driven cars and vehicles of all kinds, except mobile homes, motorcycles, aircraft, camper trailers, and truck campers; and

(b) furniture and fixtures used in commercial, office, and hotel activities, except improvements included in class thirteen.

(2) Class nine property is taxed at 13.3% of its market value.

84-301.11. Class ten property—description—taxable percentage. (1) Class ten property includes:

(a) aerial, surface, and portable ski lifts and ski tows, including the towers, cables, ropes, sheave assemblies, conveying devices, power units, and all accessories;

(b) manufacturing and mining machinery, fixtures, and supplies, except those included in class eighteen; and

(c) camper trailers and truck campers valued in the "N.A.D.A. Recreational Vehicle Appraisal Guide".

(2) Class ten property is taxed at 12% of market value.

84-301.12. Class eleven property—description—taxable property. (1) Class eleven property includes:

(a) all land, except agricultural land meeting the qualification of 84-437.2;

(b) all improvements, except those included in classes fifteen and eighteen;

(c) all trailers affixed to land owned, leased, or under contract for purchase by the trailer owner; and

(d) all mobile homes, except:

(i) those held by a distributor or dealer of mobile homes as part of his stock in trade; and

(ii) those included in class fifteen.

(2) Class eleven property is taxed at 12% of its market value, or so much of 12% as is determined under 84-309, whichever is less.

84-301.13. Class twelve property—description—taxable percentage. (1) Class twelve property includes:

(a) boat and all watercraft;

(b) aircraft;

(c) motorcycles; and

(d) large farm machinery valued in the official guide tractors and farm implements and department valuation schedules.

(2) Class twelve property is taxed at 11% of its market value.

84-301.14. Class thirteen property—description—taxable percentage. (1) Class thirteen property includes the incremental increase in the value of real estate produced by repairing, maintaining, or improving existing improvements.

(2) Class thirteen property is taxed at:

(a) 2.4% of the market value for the first full year following completion of the repair, maintenance, or improving of existing improvements;

(b) 4.8% of the market value for the second full year following completion of the repair, maintenance, or improving of existing improvements;

(c) 7.2% of the market value for the third full year following completion of the repair, maintenance, or improving of existing improvements;

(d) 9.6% of the market value for the fourth full year following completion of the repair, maintenance, or improving of existing improvements; and

(e) 12% of the market value for the fifth full year and every year thereafter following completion of the repair, maintenance, or improving of existing improvements.

84-301.15. Class fourteen property—description—taxable percentage. (1) Class fourteen property includes:

(a) all poles, lines, transformers, transformer stations, meters, tools, improvements, machinery and other property, except that included in class eighteen, used and owned by persons, firms, corporations, or other organizations that are engaged in the business of furnishing telephone communications exclusively to rural areas or to rural areas and cities and towns of 800 persons or less. The average circuit miles of each station on the telephone communications system must be more than 1 ¼ miles to qualify for this classification;

(b) tools, implements, and machinery used to repair and maintain machinery not used for manufacturing and mining purposes;

(c) electric transformers and meters, electric light and power substation machinery, and natural gas measuring and regulating station equipment, meters, and compressor station machinery owned by centrally assessed public utilities, and tools used in the repair and maintenance of the property included in this subsection; and

(d) livestock, poultry, and unprocessed products of both.

(2) Class fourteen is taxed at 8% of its market value.

84-301.16. Class fifteen property—description—taxable percentage. (1) Class fifteen property includes so much of the market value of any improvement on real property, a trailer affixed to land, or mobile home and appurtenant land not exceeding 5 acres, as does not exceed \$35,000, when such dwelling and land are owned or under contract for deed and are actually occupied for at least 10 months per year as the primary residential dwelling of:

(a) a widow or widower 62 years of age or older who qualifies under the income limitations of (c) of this subsection;

(b) a widow or widower of any age with dependent children who qualifies under the income limitations of (c) of this subsection; or

(c) a recipient or recipients of retirement or disability benefits whose total income from all sources is not more than \$7,000 for a single person or \$8,000 for a married couple.

(2) (a) A person applying for classification of property under this class must make an affidavit to the department of revenue on a form provided by the department without cost as to:

(i) his income, if applicable;

(ii) his retirement benefits, if applicable;

(iii) his marital status if applicable;

(iv) the fact that he maintains the land and improvements as his primary residential dwellings; and

(v) such other information as is relevant to the applicant's eligibility.

(b) This application must be made before March 1 of the year after the applicant becomes eligible under this classification.

(c) For the purpose of the affidavit required for classification of property under this class it shall be sufficient if the applicant signs a statement swearing to or affirming the correctness of the information supplied whether or not the statement is signed before a person authorized to administer oaths, and mails the application and statement to the department of revenue. This signed statement shall be treated as a statement under oath or equivalent affirmation for the purposes of 94-7-203, relating to the criminal offense of false swearing.

(3) Class fifteen property is taxed at 6% of its market value or so much of 6% as is determined under 84-309, whichever is less.

84-301.17. Class sixteen property—description—taxable percentage. (1) Class sixteen property includes:

(a) business inventories as defined in this section; and

(b) mobile machines, valued as other heavy construction equipment is valued, used in new industries, as defined in class eighteen.

(2) Mobile machines used in new industry are subject to the conditions imposed in class eighteen for other property used in new industries.

(3) "Business inventories" includes goods intended for sale or lease in the ordinary course of business and raw materials and work in progress with respect to such goods. Business inventories shall not include goods leased or rented or mobile homes held by a dealer or distributor as part of his stock in trade.

(4) The market value of business inventories, for property tax purposes, is the cost to the person subject to the inventory tax.

(5) Class sixteen property is taxed at 4.2% of market value.

84-301.18. Class seventeen property—description—taxable percentage. (1) Class seventeen property includes all unprocessed agricultural products on the farm or in storage, except:

(a) all perishable fruits and vegetables in farm storage and owned by the producer; and

(b) livestock and poultry and the unprocessed products of both.

(2) Class seventeen property is taxed at 3.5% of market value.

84-301.19. Class eighteen property—description—taxable percentage. (1) Class eighteen property includes:

(a) a dwelling house and the lot on which it is erected, owned, and occupied by a resident of the state who:

(i) has been honorably discharged from active service in any branch of the armed services; and

(ii) is rated 100% disabled due to a service-connected disability by the United States veterans administration or its successor. In the event of the veteran's death, the dwelling house and the lot on which it is erected shall remain in this class as long as the surviving spouse remains unmarried and the owner and occupant of the property.

(b) all property used and owned by cooperative rural electrical

and cooperative rural telephone associations as provided in (2) (a) of this section;

(c) air pollution control equipment as defined in this section; and

(d) new industrial property as defined in this section.

(2) (a) The property of all cooperative rural electrical and cooperative rural telephone associations organized under the laws of Montana is included in this class; except that when less than 95% of the electricity consumers or telephone users within the incorporated limits of a city or town are served by the cooperative organization, the property is included in class eighteen.

(b) "Air pollution control equipment" means facilities, machinery, or equipment, attached or unattached to real property, utilized to reduce, eliminate, control, or prevent air pollution. The department of health and environmental sciences determines if such utilization is being made.

(c) "New industrial property" means any new industrial plant including land, buildings, machinery, and fixtures, except mobile machinery, which is used by a new industry during the first 3 years of its operation. The property may not have been assessed prior to July 1, 1961, within the state of Montana.

(i) New industrial property is limited to industries that:

(A) manufacture, mill, mine, produce, process, or fabricate materials;

(B) do similar work, employing capital and labor, in which materials unserviceable in their natural state are extracted, processed, or made fit for use or are substantially altered or treated so as to create commercial products or materials; or

(C) engage in the mechanical or chemical transformation of materials or substances into new products in the manner defined as manufacturing in the 1972 Standard Industrial Classification Manual prepared by the United States office of management and budget.

(ii) New industrial property does not include:

(A) property used by retail or wholesale merchants, commercial services of any type, agriculture, trades, or professions;

(B) a plant that will create adverse impact on existing state, county, or municipal service; or

(C) property used or employed in any industrial plant that has been in operation in this state for 3 years or longer.

(c) "New industry" means any person, corporation, firm, partnership, association, or other group that establishes a new plant or plants in Montana for the operation of a new industrial endeavor, as distinguished from a mere expansion, reorganization, or merger of an existing industry or industries.

(3) The department of revenue shall promulgate rules for the determination of what constitutes an adverse impact, taking into consideration the number of people to be employed and the size of the community in which the location is contemplated. Any person, corporation, firm, partnership, association, or other group seeking to qualify its property for inclusion in this class shall make application to the department of revenue in such a manner and form as the department requires. Once the department has made an initial determination that the industrial facility qualifies as new industrial property, the department shall then, upon proper notice, hold a hearing to determine if the new industrial classification should be retained by the property. The local taxing authority may appear at the

hearing and may waive its objection to retention of this classification if the industry agrees to the prepayment of taxes sufficient to satisfy tax requirements created by the location and construction of the facility during the construction period. When a prepayment of taxes is required, the maximum amount of prepayment shall be the amount of tax the industry would have paid within the application of the class seven percentage to such property.

(4) If a major new industrial facility qualifies under class eighteen, the reduction of its yearly payment of property taxes for reimbursement of its prepaid taxes as provided for in 84-41-105 does not begin until the class eighteen qualification expires.

(5) Class eighteen property shall be taxed at 2.8% of its market value or in the case of property classified under (1) (a) of this section, so much of 2.8% as is determined under 84-309, whichever is less.

84-301-20. Class nineteen property—description—taxable value. (1) Class nineteen property includes the annual gross proceeds of metal mines.

(2) Class nineteen property is taxed at 3% of its assessed value, which is 100% of annual gross proceeds.

84-301.21. Class of property—certain recreational vehicles. (1) There is a class of property which includes a pickup camper, travel trailer, including a fifth wheel trailer, or motor home which is owned by and is actually used primarily by a person 60 years of age or older who is retired from full employment and whose total income each year from all sources does not exceed the income limitations set in Class Fifteen of this section for a single person or married couple, whichever is applicable.

(2) A person who applies for this classification must file an affidavit with the department of revenue as to his income as set forth in Class Fifteen herein.

(3) This class of property is taxed at 6% of market value.

84-308. (2000.6) Basis for imposition of taxes on moneyed capital and bank shares. As a basis for the imposition of taxes upon the different classes of property herein specified, a percentage of the true and full value of each class shall be taken as follows:

Moneyed capital and shares of banks both national and state, thirty per centum (30%) of true and full value on that portion of the true and full value not represented by surplus, as shown on the books of the bank; seven per centum (7%) on that portion of the true and full value represented by surplus as shown on the books of the bank; provided that on that portion of any such surplus which is over and above the amount represented by the stated capital of a bank, the excess shall be subject to thirty per centum (30%) of true and full value. The state department of revenue shall prepare, distribute and cause to be used such forms as it may require to obtain from the banks doing business in this state reports of such facts and figures as may be necessary to ascertain the taxable value of bank shares as a basis for the imposition of taxes.

SPECIAL NOTE: To compensate for the increased values that resulted from the statewide revaluation program, the percentages for arriving at the taxable value of property classified under sections 84-301.12, 84-301.16 (1) (b), and 84-301.19 (1) (a) were reduced. The percentages are as follows: 84-301.12 - 8.55%, 84-301.16 (1) (b) - 4.275%, 84-301.19 (1) (a) - 2%.

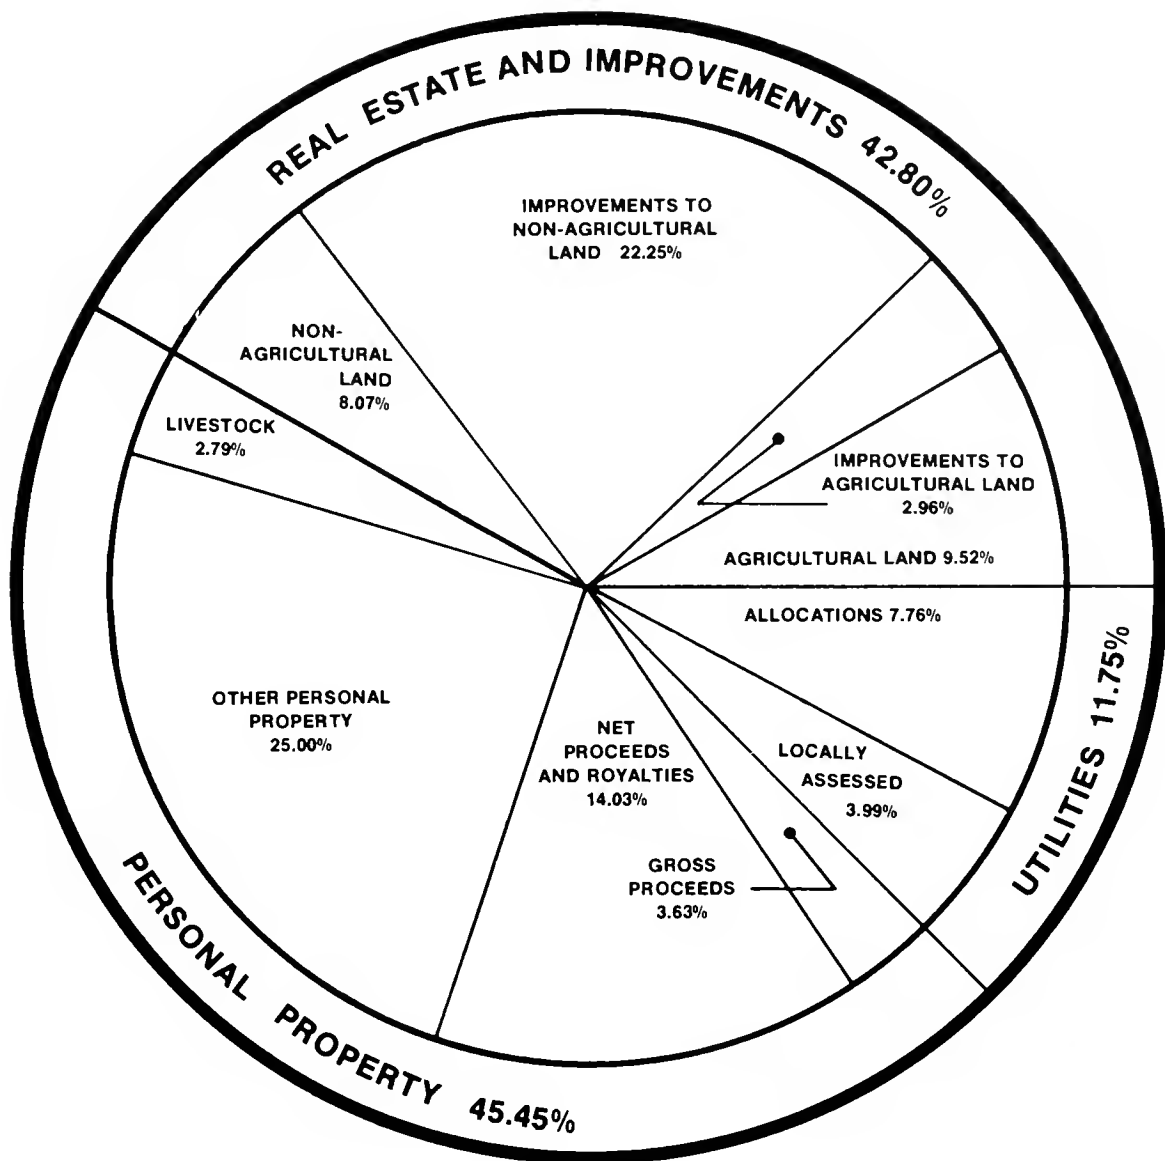

ANALYSIS OF TAXABLE VALUATION 1929-1978

TAXATION OF MINERALS

Net Proceeds

Montana's net proceeds law provides a special method for assessing the value of mining property. The drafters of Montana's first Constitution and mine tax law recognized the difficulty of valuing the mineral bearing property of the state, and didn't wish to have taxes imposed which would impede the development of the mining industry. Thus, net proceeds, defined as the annual gross value of the product of mines less certain deductions, plus the price paid the U.S. government for the mineral property (\$2.50 to \$20.00 per acre), serve as the measure of the value of mining property and take the regular mill levies of the taxing district in which the property lies. Oil and gas properties, lime rock, gypsum and other quarries and mines, except coal and metal mines producing valuable minerals and stones, come under the provisions of the net proceeds law. The taxable value of the assessment of net proceeds and the price of mining property paid the U.S. government is 100% of market value.

Gross Proceeds

The 1975 Legislative Session enacted a particular method for valuing coal mining property. The gross yield of a mine derived from the contract sales price of the coal produced serves as the measure of value. (Contract sales price is defined as the price of the coal extracted and prepared for shipment f.o.b. mine excluding that amount charged by the seller to pay taxes on production.) The taxable value of gross proceeds is 45% of the assessed value in the case of strip mines and 33 1/3% of assessed value in the case of underground mines. The 1977 Legislative Session changed the method of valuing metal mining property from net proceeds to gross proceeds. Taxable value is 3% of the gross proceeds from metal mines.

Royalties

Royalties from mineral production are also taxable at 100% of market value. In the case of oil and gas, royalties are assessed to and taxes are paid by the operator in behalf of the royalty owner. Other royalties are assessed directly to the owner and taxes are paid by him.

Other Property

The taxable value of machinery, structures and

appurtenances is 12% of market value. If the surface ground of a mine is used for some purpose other than mining it is assessed at its full value and is taxable for such other purpose.

License and Severance Taxes

In addition to the property taxes paid on the assessments listed above, mine operators pay certain license and severance taxes to the state. Oil producers pay 2.1% of the value of the first \$6000 gross value of all oil produced and 2.65% on the balance of production in each lease. Gas producers pay 2.65% of the total gross value of production from each well.

Like the oil or gas producers severance tax, the metalliferous mines license tax is also an ad valorem severance tax. Metal mine operators pay .15% of the first \$100,000 of gross product plus one dollar; .575% of the next \$150,000 of gross product; .86% of the next \$150,000 of gross product; 1.15% of the next \$100,000 of gross product; and 1.438% of any gross product over \$500,000 in value.

Coal mines pay a severance tax which depends upon the heat content of the coal and the method of mining utilized. Strip coal mines pay the greater of: 12 cents per ton or 20% of contract sales price on coal rated less than 7000 BTU per pound, 22 cents per ton or 30% of contract sales price on coal rated between 7001 and 8000 BTU per pound, 34 cents per ton or 30% of contract sales price on coal rated between 8001 and 9000 BTU per pound and 40 cents per ton or 30% of contract sales price on coal rated over 9000 BTU per pound. A similar, but considerably lower, set of rates is used for coal extracted from underground mines. The first 20,000 tons of production during each calendar year is exempt from tax.

Cement and gypsum producers pay 22 cents per ton of cement and 5 cents per ton of gypsum. Micaceous minerals (vermiculite, perlite, kerrite, maconite, etc.) producers pay 5 cents per ton of product.

Oil and gas producers also pay a severance tax to defray the expenses of the Oil and Gas Conservation Commission. It is 2/10 of 1% of the market value for each barrel of oil. The same rate applies to each 10,000 cubic feet of natural gas.

Finally, all nonrenewable resource producers pay the Resource Indemnity Trust Tax of .5% of the gross value of their production. The proceeds of this tax will be used for environmental protection and improvement.

APPENDIX A

REVENUE OVERSIGHT COMMITTEE CRITIQUE OF THE DEPARTMENT OF REVENUE'S ACTIVITY

As required in Chapter 458, Laws of 1977, the Revenue Oversight Committee herein presents its critique of the operations of the Montana Department of Revenue during the 1977-1978 interim.

The committee has had excellent cooperation from the department during 1977-78.

Requests for information or research that the committee required were answered satisfactorily. Department staff were available as needed for direct personal contact with the committee.

The problems and complaints resulting from the operation of the department that were brought to the committee's attention by other legislators or the public were resolved adequately. This is a most desirable result of the interaction of the department and the committee.

As is always the case, occasions arose when the department was in doubt as to legislative intent of recently passed legislation. The opportunity for direct and extended discussion on such matters between the department and the legislature's tax specialists serving on the committee has proved to be valuable. However, the process was hampered by a statutory conflict. The statute creating the Revenue Oversight Committee directed it to review rules proposed by the revenue department. Another section, 2-4-402 (82-4203.5) places the duty of reviewing **all** executive branch rules with the Administrative Code Committee. Dual review of revenue department rules produced undesirable time lag in the review process and occasional conflict between the two committees. The Revenue Oversight Committee therefore discontinued review of revenue department rules. However, the committee feels that taxation and revenue legislation is often complex and best handled by the Revenue Oversight Committee with its con-

centration of legislative tax expertise. It will present the legislature in the coming session with a bill transferring jurisdiction over Department of Revenue rules from the Administrative Code Committee to the Revenue Oversight Committee.

The first year's administration of the Homestead Tax Relief by the department produced some complications. There were local problems, as is inevitable in setting up a new system. However, in 1978, the program seems to be working adequately now that revaluation has been completed.

The real property revaluation proved to be complex and extended far too late into 1978. This was the result primarily of erratic and inadequate funding by the legislature and the fact that the department had no choice but to use too many hastily trained assessors for the gigantic job. The Oversight Committee intends to continue its review of the department's operation in this project during the coming biennium to ensure that existing assessment inequities are remedied. It is hoped that computer processing will update the data base to 1979 values.

The very heavy load of committee work during the 18-month interim—the result of the committee's commitment to remedy a broad spectrum of inequities in Montana tax law—precluded intense and personal observation of the department's day-by-day activities. Without such background, a review of the department's budget would be meaningless, and none was attempted. During the coming biennium the committee will spend time observing the inner workings of the department.

/s/ Rep. Herb Huennekens, Chairman
For the Revenue Oversight Committee
